**DESIGN WORKSHOP**  
**Estabrook School off-site Improvements**

The Town of Lexington Department of Public Works will be hosting a design workshop on October 24th, 2012. The intent of this workshop is to present the draft design for the off-site improvements for the Estabrook School. The plan has been revised since the June meeting based on input received and further design detail. This workshop will be held at the Samuel Hadley Public Services Building in the Cafeteria on the first floor from 6:00PM to 7:30PM.

The workshop will include a presentation by the Department of Public Works and the consultant for this project followed by a comment, question and answer period. The first presentation will be to discuss the proposed improvements and sidewalk installation along Robinson Road from the rear entrance to Grove Street including the intersection. Following the comments, question and answer session for this area we will present the Grove Street concepts in the vicinity of the school entrance. This will also be followed by a comments, question and answer session.

We hope you can attend to review the plans and provide feedback

Thank You,

  
Department of Public Works
